Ken at IO-Port has the cheaper HANS in stock, and is placing an order for more of the R3 Rage.

Anyone who still hasn't ordered should expect stocks to be low as NASA drivers all over the country finish procrastinating !

I ordered a R3 rage from IO port and they said they were ordering a few extras in medium so they might have some for anyone who has yet to order. They said mine should be on time for june at T-hill.

That is exactly what I'm getting (and how I knew about the stock levels !)

NASA just pushed the mandatory in use date to July 2nd due to the back ordered status, at least for the Utah race.

Jim Foxx will be arriving at Thunderhill Thursday and running with Trackmasters Friday.

My car is in the shop getting the front/rear quarter panel painted. I originally was just going to use a rattle can but after seeing how great a job Art's friend did on the rear quarter panel I decided to get it professionally painted.

I should get to Thunderhill Friday afternoon around 5-5:30PM

Sid & I spent Sunday afternoon helping Aubie finish up his car.

He's bringing it in tomorrow to get tech'ed and a logbook.

Here's a preview of the #27 NorCal 944-SPEC.
