

For Sale 1985.5 944 Race car

Posted by 400HP944 - 08 Dec 2018 14:24

Up for sale is my 1985-1/2 944 race car. This car is very well sorted and holds numerous POC track records. Car is currently raced GT-7 in the POC but can run SP1 in PCA or Spec 944 in NASA. Meticulously maintained, this car has a complete new suspension by Dwain Dement @ Vision Motorsports in 2017, including custom reinforced steel control arms with replaceable ball joints, Bilstein shocks, Tarett sway bars front and rear, solid transmission mount. Car has a manual steering rack (not a de-powered unit), that was recently rebuilt, chromoly cage, custom console with gauges, fire system, wired for coolshirt, Cobra Sebring Pro-Fit seat, wired for transponder (not included), Transmission has LSD and short 5th. Motor is strong with 138HP and 141TQ at the wheels.

Car has the usual race track rash on the front. Graphics are vinyl and can be removed easily.

New recently replaced items include:

New radiator

inner and outer tie rods

front rotors and brake pads

full 4 wheel alignment

Spares include:

Spare rebuilt transmission with LSD and short 5th

Extra set of wheels and tires

Misc maintenance items

Please PM me for additional information, questions and photos.

\$9500.00 OBO Including Spares

Reason for selling? I bought a Spec Boxter so this car needs to go to a good home.
