FS: BRAILLE LT-WT BATTERY-\$70 Posted by spec28 - 25 Jan 2011 22:29
For Sale is a Braille LightWeight Battery Model B14115.
This is the 11 lb racing unit with both post and lug terminals. Also includes a custom mount that bolts the battery into a Porsche 944 without modifying the stock mount.
Pull out the stock battery, bolt in the Brialle and drop 25+ pounds off the passenger side.
I ran this unit for only 2 events. The car is gone, now I dojn't need the Battery. Works like new.
Paid \$158sell for \$70 with mount.
