

## WTB: adj camber plates, rear coilovers

Posted by ideola - 01 Apr 2010 19:42

---

Looking for a set of used adjustable camber plates (prefer Ground Control or Racer's Edge)

Looking for a set of 968 M030 rear coilovers or similar aftermarket setup, used is OK but would prefer the dampers to be in usable condition (as opposed to requiring a rebuild)

For both items, cosmetics are less important than functional condition. Looking for affordable alternatives to buying these items new.

Found the camber plates, still looking for a decent setup on the rear shocks. Would prefer a set of the 968 coil overs, but will also consider Bilstein HDs or adjustable Konis.
