

Track Records Database

Posted by AgRacer - 10 Oct 2012 10:36

Do we have a compiled database for track records around the country as run under the 944 Spec ruleset? We think there was a new record set at Eagles Canyon Raceway last sunday but there was no previous record held. I understand that anything we compile is going to be rendered null once we transition to the new tire, but it could set a good benchmark for new guys coming in as well as further development. I may see what I can dig up for fast times in the Texas Region for future reference.

New updates to the Track Records database for Texas.

|------------------------------------|-------------|-------------|----------|
| Motorsports Ranch Houston 2.958 CW | Phil Hanson | 1:51.802 | |
| NOLA Motorsports Park | 956 | Phil Hanson | 2:07.022 |

Should have a lot more of these to come with the new RRs. We ran RA1s on Saturday and RRs on Sunday this past week end. Easy ~1.5 seconds a lap difference.
