

Hawk Brake pads

Posted by Clemsonracer - 19 Dec 2016 16:32

Its getting time to put brake pads on, what compounds do you all you use?

DTC-60 front and Blue rear for the better part of 3 seasons now. I think the 70/60 combo is too much for our weight and lends to easy lock up. The split in pad friction seems to help a little in brake balance.

Actually I switched to the Hawk DTC-70 Front and DTC-60 Rear. They work great for me. As Jason says, you will want less aggressive pads in the rear than the front.

Chuck
