Tires to start the season! Posted by Sterling Doc - 06 Apr 2011 19:12	
Guys,	
Spec tire class, with no Spec tire. I have over a week. I also have no ETA on the flad planned on that. So, I've talked this going to have some fun with this. Bring wand you can run. Expect some creative & (and wide) they are. I'm not giving away	can has completely derailed Toyo production. So, we have a no firm direction from the national office yet, and a race in just ew Toyos that our out there, so I'd get something else if you over with Bryan Cohn, and rather than stress about things, we're thatever tire you want on your stock/class legal 15" rim, equot; adjustments" for your tires depending on how sticky any secrets in what I will do, only that it will NOT involve ballast. We're going to make lemonade out of this lemon! Looking
