Creative way to reinstall windows for transit? Posted by Tabbasco - 30 Oct 2012 05:38
Trying not to reinvent the wheeldoes anyone have a way to install windows for transit to and from an event.
I removed mine for both weight and safety, as a hit on the door could send glass flying, but need to reinstall for transit
Was considering an aluminum cradle or possibly drilling thru the glass (if possible) and inserting two o three brackets to hold the window in place
Suggestions???
